EXECUTIVE SUMMARY

This document constitutes the Certification Report for the certification file of the site Giesecke+Devrient Development Center Spain (DCS) .

The following services and/or processes provided by Giesecke+Devrient Development Center Spain (DCS) are in the scope of the site evaluation process:

Smart Card Software Development (Smart Card OS Development, Smart Card Applet and Application Development, Testing, Release of developed components).

Developer/manufacturer: Giesecke + Devrient Mobile Security Iberia S.A.

Sponsor: Giesecke + Devrient Mobile Security Iberia S.A.

Certification Body: Centro Criptológico Nacional (CCN).

ITSEF: Applus Laboratories

Protection Profile: No.

Evaluation Level: Common Criteria v3.1 R5

To re-use ALC certified security assurance components in evaluations up to EAL5.

Security Assurance Components: ALC_CMC.4, ALC_CMS.5, ALC_DVS.2, ALC_LCD.1, AST_CCL.1, AST_ECD.1, AST_INT.1, AST_OBJ.1, AST_REQ.1, AST_SPD.1 and AST_SSS.1

Resistance to Attack Potential: High.

Evaluation end date: 09/05/2023.

Re-use expiration date: 03/08/2025¹.

All the assurance components required by the evaluation have been assigned a “PASS” verdict are resistant to attackers with a High attack potential. Consequently, the laboratory Applus Laboratories assigns the “PASS” VERDICT to the whole evaluation due all the evaluator actions are satisfied, as defined by the Common Criteria v3.1 R5, the supporting document guidance CCDB-2007-11-001 Site Certification [SCER] and the JIWG supporting document Minimum site security requirements [MSSR].

¹ This audit was performed as an on-site audit according to [IT-013] and [JIL-COVID] policies, and therefore the re-use of evaluation activities is limited at most to 30 months since the site audit date (03/02/2023).

The assurance components are chosen in order to re-use ALC certified security assurance components in evaluations up to EAL5. It has been assumed that the security measures are resistant to attacks performed by attackers with a *High* attack potential.

Considering the obtained evidences during the instruction of the certification request of the site Giesecke+Devrient Development Center Spain (DCS), a positive resolution is proposed.

SITE SUMMARY

The Giesecke+Devrient Development Center Spain (DCS) is located at

Carrer del Número 114, nº 27, Polígon Pratenc

E-08820 El Prat de Llobregat

Barcelona

Spain

The site covers one building where CC relevant development is performed: BCN2. DCS is located in building BCN2. Building BCN2 is used by G+D exclusively. The site is used for development of Smart Card software and testing. Development and testing activities are restricted to the designated development area.

SITE DESCRIPTION

The following services and/or processes provided by Giesecke+Devrient Development Center Spain (DCS) are in the scope of the site evaluation process:

- Smart Card Software Development (Smart Card OS Development, Smart Card Applet and Application Development, Testing, Release of developed components).

The site evaluation covers the development of products based on the following operating systems:

- Sm@rtSIM CX
- SmartCafe Expert
- Convego JOIN
- STARCOS
- Sm@rtSIM Next Generation

Supporting services at DCS:

- Management of physical security and IT-Security
- IT-Services (storage, backup, etc.)
- Administrative Services (e.g. Human Resources related services)

TYPICAL LIFE CYCLE OF SUPPORTED TOEs

It is assumed that product certifications which refer to this certificate are related to a TOE that follows a TOE life-cycle according to [PP84], chap. 1.2.3. The Giesecke+Devrient Development Center Spain (DCS) covers the Phase 1 (IC Embedded Software Development) according to [PP84].

SECURITY ASSURANCE REQUIREMENTS

The site was evaluated with all the evidence required to fulfil the evaluation activities resistant to attackers with a **High** attack potential, according to Common Criteria for Information Technology Security Evaluation Version 3.1 Revision 5.

The assurance components are chosen in order to re-use ALC certified security assurance components in evaluations up to EAL5. Therefore, it has been assumed that the security measures are resistant to attacks performed by attackers with a High attack potential.

Assurance Class	Assurance Components
AST: Site Security Target Evaluation	AST_INT.1 SST introduction
	AST_CCL.1 Conformance claims
	AST_SPD.1 Security problem definition
	AST_OBJ.1 Security objectives
	AST_ECD.1 Extended components definition
	AST_REQ.1 Security assurance requirements
	AST_SSS.1 Site summary specification
ALC: Life-cycle support	ALC_CMC.4 Production support, acceptance procedures and automation
	ALC_CMS.5 Development tools CM coverage
	ALC_DVS.2 Sufficiency of security measures
	ALC_LCD.1 Developer defined life-cycle model

Please note that ALC_DEL.1 has been excluded from the SST since this site does not perform external deliveries and ALC_DEL.1 is therefore not applicable.

IDENTIFICATION

Site Name	Giesecke+Devrient Development Center Spain (DCS)
Site Location	Giesecke+Devrient Mobile Security Iberia S.A. Carrer del Número 114, no. 27 / Poligon Pratenc 08820 El Prat de Llobregat (Barcelona) Spain
Areas in the scope of the certificate as declared in the SST	See section 2.1 of Site Security Target.
Activities in the product development	Life cycle phases: Phase 1 (IC Embedded Software Development)
Site Security Target	Site Security Target Giesecke+Devrient Development Center Spain (DCS) Version 2.7/23.03.2023
Evaluation Level	Common Criteria v3.1 R5 To re-use ALC certified security assurance components in evaluations up to EAL5
Security Assurance Components	ALC_CMC.4, ALC_CMS.5, ALC_DVS.2, ALC_LCD.1, AST_CCL.1, AST_ECD.1, AST_INT.1, AST_OBJ.1, AST_REQ.1, AST_SPD.1 and AST_SSS.1.
Attack Potential	High

SECURITY POLICIES

Giesecke+Devrient Development Center Spain (DCS) shall implement a set of security policies assuring the fulfilment of different standards and security demands.

The detail of these policies is documented in the Site Security Target [SST], chapter 4.3 (Organisational Security Policies).

ASSUMPTIONS AND OPERATIONAL ENVIRONMENT

Each site operating in a production flow must rely on preconditions provided by the previous site. Each site has to rely on the information received by the previous site/client. This is reflected by the assumptions that must be defined for the interface.

The detail of the assumptions considered to be applicable is documented in the Site Security Target [SST], chapter 4.4 (Assumptions).

CLARIFICATIONS ON NON-COVERED THREATS

The following threats do not suppose a risk for the site Giesecke+Devrient Development Center Spain (DCS), although the agents implementing attacks have a High attack potential for the Security Assurance Requirements ALC_CMC.4, ALC_CMS.5, ALC_DVS.2, ALC_LCD.1, AST_CCL.1, AST_ECD.1, AST_INT.1, AST_OBJ.1, AST_REQ.1, AST_SPD.1 and AST_SSS.1, and always fulfilling the assumptions and the proper security policies satisfaction.

For any other threat not included in this list, the evaluation results of the site security properties and the associated certificate, do not guarantee any resistance.

The detail of these threats is documented in the Site Security Target [SST], chapter 4.2 (Threats).

DOCUMENTS

The site evaluation has been based on the evidences listed in the chapter 5 (Evaluation evidence) of the Evaluation Technical Report of Giesecke+Devrient Development Center Spain (DCS) [EXT-8438].

These evidences describe the global procedures and security measures in the site. For each specific TOE, some accessory documents including specific characteristics of the TOE should be provided in addition to the above evidences.

The above evidences should be made available to ITSEFs in order to re-use the results of this certificate.

EVALUATION RESULTS

The site Giesecke+Devrient Development Center Spain (DCS) has been evaluated against the Security Target [SST].

All the assurance components required by the evaluation have been assigned a “PASS” verdict are resistant to attackers with a High attack potential. Consequently, the laboratory Applus Laboratories assigns the “PASS” VERDICT to the whole evaluation due all the evaluator actions are satisfied, as defined by the Common Criteria v3.1 R5, the supporting document guidance CCDB-2007-11-001 Site Certification [SCER] and the JIWG supporting document Minimum site security requirements [MSSR].

COMMENTS & RECOMMENDATIONS FROM THE EVALUATION TEAM

Next, recommendations regarding the secure usage of the site are provided. These have been collected along the evaluation process and are detailed to be considered.

- The consumer from the current certificate should consider the validity of certification from the BSI with identification number BSI-DSZ-CC-S-0185-2021-MA-01. The current PASS verdict is conditioned by the certificate of G+D Headquarters (whose Site evaluated under CC methodology is identified as DCG) validated by the BSI. A revocation of the certificate of DCG would imply the revocation of this certificate.

CERTIFIER RECOMMENDATIONS

Considering the obtained evidences during the instruction of the certification request of the site Giesecke+Devrient Development Center Spain (DCS), a positive resolution is proposed.

This Certification Report only applies to the site and its evaluated scope as indicated. The confirmed assurance components are only valid on the condition that all assumptions and preconditions required by the site, as given in this report and in the Site Security Target, are observed.

The owner of the certificate is obliged:

1. when advertising the Site Certificate or the fact of the Site Certification, to refer to the Site Certification Report as well as to provide the Site Certification Report and the Site Security Target and documentation mentioned herein to any client for the application and proper usage of the certified site,
2. to inform this Certification Body immediately about vulnerabilities of the site that have been identified by the sponsor or applicant or any third party after issuance of the certificate,
3. to inform this Certification Body immediately about security relevant changes in the scope of the evaluated site, e.g. changes related to the logical and physical development and production environment, to processes, and to services of the site.

In case of changes to the certified site, the validity can be extended to the changed site, provided the sponsor applies for assurance continuity (i.e. re-certification or maintenance) of the modified site, in accordance with the procedural requirements, and the evaluation does not reveal any security deficiencies.

Additionally, this Certification Body wants to remark the following:

1. This site consumes services that are managed from G&D headquarters. To assess the compliance with the CC security assurance requirements declared in the applicable SST, the ITSEF identified these services during the site visit and evaluators made a list of services consumed by this site which are operated from Giesecke+Devrient Mobile Security

Development Center Germany which are listed in the evaluation evidence [SPBO]. BSI has acknowledged that these services have been evaluated in the scope of the site certificate identified by the following reference BSI-DSZ-CC-S-0185-2021-MA-01 [DCG-CR].

2. According to remark 1, the current certificate validity is conditioned by the certificate BSI-DSZ-CC-S-0185-2021-MA-01. A revocation of the certificate of Development Center Germany may imply the revocation of this certificate.
3. Reuse of evaluation of activities for multisite development projects are bound to those certified sites which are listed in section 2.2.3 of the [SST]. In case of revocation of some of the certificates in this list, reuse of evaluation activities cannot be applied.

RE-USE OF THE SITE CERTIFICATE

The re-use of this Site Certificate is limited to the extent defined in the Spanish Certification Body (CCN) Technical Interpretation “IT-003 Instrucción técnica: reutilización de resultados mediante la certificación de centros de desarrollo” [IT-003], the Supporting Document Guidance Site Certification [SCER] and the SOG-IS Smartcard and similar devices supporting documents, such as the Minimum site security requirements [MSSR].

The results from a site certification can be re-used for product certifications. For each specific TOE, accessory documents including specific TOE characteristics should be evaluated in addition to the above specified documents. These evidences shall rely and shall be consistent with the evidences used in the site certificate evaluation and in the Site Security Target.

Currently the Recognition Agreements in place do not cover the recognition of Site Certificates. However, the evaluation process performed was outlined according to the rules of the agreements and by using the agreed supporting document on Site Certification [SCER] and [MSSR]. Therefore, the results of this evaluation and certification procedure can be re-used by the issuing scheme in a subsequent product evaluation and certification procedure.

When re-using the results of the activities that uphold this site certificate in a product evaluation, the scheme responsible for certifying the product may decide to fully recognize the results or contact this scheme to query about specific assurance activities carried out in the scope of this site certification.

SITE CERTIFICATE VALIDITY REVIEW

In this case, and according to arrangements in SOG-IS Smart Card and similar devices technical domain, to re-use the evaluation activities that uphold this Site Certificate in a product specific evaluation, a reassessment of the assurance activities validity should be done at most 30 months after the site audit date as an on-site audit procedure of [IT-013] and [JIL-COVID] policies has been

applied. Therefore, a reassessment of the assurance activities validity should be done before 03/08/2025.

SHARED TECHNICAL AUDIT REPORT (STAR)

The evaluation activities carried out in this site certification dossier have been summarized in a Shared Technical Audit Report (STAR). This STAR has been validated by this Certification Body according to [START]. The reference of the STAR is:

- **Report name:** SITE TECHNICAL AUDIT REPORT (STAR). Giesecke+Devrient Development Center Spain (DCS).
- **Report ID:** CCEGAD001R4.
- **Version:** M1.
- **Issue Date:** 08/05/2023
- **SHA256:** 60df7f45fb359a4635471d3ba015720ea7ae7f643f1ea2b5a1f6c52bce15a959
- **Issuing ITSEF:** Applus Laboratories.
- **Site audit dates:** 02/02/2023-03/02/2023.

The STAR report constitutes an evaluation evidence, therefore according to article 25 of Presidential Order PRE/2740/2007 which regulates the CCN Certification Body, written authorization must be requested by Applus Laboratories to the Certification Body to share any information of this certification dossier (including the STAR report) with third parties.

It is expected that if the applicant Giesecke + Devrient Mobile Security Iberia S.A. is willing to share the STAR report with any third party, they may contact Applus Laboratories to perform an authorization request to the CCN Certification Body to distribute this report.

SITE SECURITY TARGET

Along with this certification report, the complete site security target (SST) of the evaluation is stored and protected in the Certification Body premises. This document is identified as:

- Site Security Target Giesecke+Devrient Development Center Spain (DCS), Version 2.7/23.03.2023.

The public version of this document constitutes the SST Lite. The SST Lite has also been reviewed for the needs of publication according to sanitation [SANT], and it is published along with this certification report in the Certification Body. The SST Lite identifier is:

- Site Security Target Lite Giesecke+Devrient Development Center Spain (DCS), Version 2.7/23.03.2023.
