EXECUTIVE SUMMARY

This document constitutes the Certification Report for the certification file of the site Veridos Matsoukis S.A. Security Printing.

The following services and/or processes provided by VDMAT are in the scope of the site evaluation process:

- Secure reception, storage and delivery of Smart Card modules. Delivery includes delivery for secure destruction.
- Secure reception and storage of initialisation data for Smart Card Production
- Secure reception and storage of cryptographic keys, derivation of card specific keys.
- Smart Card Production comprising configuration, completion (i.e. finishing the Smart Card OS) and initialisation of Smart Card modules
- Secure inlay manufacturing
- Secure Destruction of Smart Card Modules

Developer/manufacturer: VERIDOS MATSOUKIS SECURITY PRINTING S.A.

Sponsor: VERIDOS MATSOUKIS SECURITY PRINTING S.A.

Certification Body: Centro Criptológico Nacional (CCN).

ITSEF: Applus Laboratories

Protection Profile: No.

Evaluation Level: Common Criteria v3.1 R5

To re-use ALC certified security assurance components in evaluations up to EAL5 + ALC_DVS.2 + AVA_VAN.5

Security Assurance Components: ALC_CMC.4, ALC_CMS.5, ALC_DEL.1, ALC_DVS.2, ALC_LCD.1, AST_CCL.1, AST_ECD.1, AST_INT.1, AST_OBJ.1, AST_REQ.1, AST_SPD.1 and AST_SSS.1

Resistance to Attack Potential: High.

Evaluation end date: 01/03/2024.

Re-use expiration date: 01/02/2026¹.

¹ This audit was performed as a on site audit, and therefore the re-use of evaluation activities is limited at most to 30 months since the site audit date (01/08/2023) as this site has been previously audited on site by this CB.

All the assurance components required by the evaluation have been assigned a “PASS” verdict are resistant to attackers with a High attack potential. Consequently, the laboratory Applus Laboratories assigns the “PASS” VERDICT to the whole evaluation due all the evaluator actions are satisfied, as defined by the Common Criteria v3.1 R5, the supporting document guidance CCDB-2007-11-001 Site Certification [SCER] and the JIWG supporting document Minimum site security requirements [MSSR].

The assurance components are chosen in order to re-use ALC certified security assurance components in evaluations up to EAL5 + ALC_DVS.2 + AVA_VAN.5. It has been assumed that the security measures are resistant to attacks performed by attackers with a *High* attack potential.

Considering the obtained evidences during the instruction of the certification request of the site Veridos Matsoukis S.A. Security Printing, a positive resolution is proposed.

SITE SUMMARY

Veridos Matsoukis S.A. Security Printing is located at

Dimocratias Ave. 69

13122 Ilion, Attica

Greece

Veridos Matsoukis S.A Security Printing provides services for Smart Card Production and is abbreviated by 'VDMAT'.

The location consists of three buildings named A, B and C, with different subsections. The buildings are located on a fenced area only used by VDMAT. Inside of buildings A, B and C are the high security areas (HSA) as in the following list:

The HSA in building A consists of

- A server room in 2nd floor
- The security control room in 2nd floor
- The shredder room at ground floor
- The main vault in the basement where finished goods are stored. Not only CC relevant.
- Vault at ground floor

The HSA in building B consists of

- the production area in 1st floor,
- Vault 1 (Ground Floor),
- Vault 2 (First Floor),

The HSA in building C consists of

- Vault of Building C (Ground Floor),

When not in production, Smart Card modules are securely stored in one of the vaults in buildings A, B or C.

The server infrastructure is located inside of the high security area. Physical Security Management, IT and the local IT administrators are located at VDMAT.

The supporting IT services are provided by GDM (Giesecke+Devrient München) located at a secure area with restricted access which has been audited.

The services provided by Giesecke+Devrient Mobile Security Development Center Germany listed in the document 'Services Used from other sites VDMAT' are covered by a valid certificate. As far as the certificate is valid, services can be used by Veridos Matsoukis S.A. Security Printing.

SITE DESCRIPTION

The following services and/or processes provided by VDMAT are in the scope of the site evaluation process:

- Secure reception, storage and delivery of Smart Card modules. Delivery includes delivery for secure destruction.
- Secure reception and storage of initialisation data for Smart Card Production
- Secure reception and storage of cryptographic keys, derivation of card specific keys.
- Smart Card Production comprising configuration, completion (i.e. finishing the Smart Card OS) and initialisation of Smart Card modules
- Secure inlay manufacturing
- Secure Destruction of Smart Card Modules

TYPICAL LIFE CYCLE OF SUPPORTED TOEs

It is assumed that product certifications which refer to this certificate are related to a TOE that follows a TOE life-cycle according to [PP84], chap. 1.2.3. The Veridos Matsoukis S.A. Security Printing covers the Phase 5 (Composite Product Integration) according to [PP84].

SECURITY ASSURANCE REQUIREMENTS

The site was evaluated with all the evidence required to fulfil the evaluation activities resistant to attackers with a **High** attack potential, according to Common Criteria for Information Technology Security Evaluation Version 3.1 Revision 5.

The assurance components are chosen in order to re-use ALC certified security assurance components in evaluations up to EAL5 + ALC_DVS.2 + AVA_VAN.5. Therefore, it has been assumed

that the security measures are resistant to attacks performed by attackers with a High attack potential.

Assurance Class	Assurance Components
AST: Site Security Target Evaluation	AST_INT.1 SST introduction
	AST_CCL.1 Conformance claims
	AST_SPD.1 Security problem definition
	AST_OBJ.1 Security objectives
	AST_ECD.1 Extended components definition
	AST_REQ.1 Security assurance requirements
	AST_SSS.1 Site summary specification
ALC: Life-cycle support	ALC_CMC.4 Production support, acceptance procedures and automation
	ALC_CMS.5 Development tools CM coverage
	ALC_DVS.2 Sufficiency of security measures
	ALC_LCD.1 Developer defined life-cycle model
	ALC_DEL.1 Delivery procedures

The site does not provide services that are covered by ALC_TAT as no development activities are carried out in this site.

IDENTIFICATION

Site Name	Veridos Matsoukis S.A. Security Printing
Site Location	Dimocratias Ave. 69 13122 Ilion, Attica Greece
Areas in the scope of the certificate as declared in the SST	See Section 2.1 of [SST]

Activities in the product development	Life cycle phases: Phase 5 (Composite Product Integration)
Site Security Target	Site Security Target Veridos Matsoukis S.A. Security Printing, version 3.3, 12/02/2024
Evaluation Level	Common Criteria v3.1 R5 To re-use ALC certified security assurance components in evaluations up to EAL5 + ALC_DVS.2 + AVA_VAN.5.
Security Assurance Components	ALC_CMC.4, ALC_CMS.5, ALC_DEL.1, ALC_DVS.2, ALC_LCD.1, AST_CCL.1, AST_ECD.1, AST_INT.1, AST_OBJ.1, AST_REQ.1, AST_SPD.1 and AST_SSS.1.
Attack Potential	High

SECURITY POLICIES

Veridos Matsoukis S.A. Security Printing shall implement a set of security policies assuring the fulfilment of different standards and security demands.

The detail of these policies is documented in the Site Security Target [SST], chapter 4.3 (Organisational Security Policies).

ASSUMPTIONS AND OPERATIONAL ENVIRONMENT

Each site operating in a production flow must rely on preconditions provided by the previous site. Each site has to rely on the information received by the previous site/client. This is reflected by the assumptions that must be defined for the interface.

The detail of the assumptions considered to be applicable is documented in the Site Security Target [SST], chapter 4.4 (Assumptions).

CLARIFICATIONS ON NON-COVERED THREATS

The following threats do not suppose a risk for the site Veridos Matsoukis S.A. Security Printing, although the agents implementing attacks have a High attack potential for the Security Assurance Requirements ALC_CMC.4, ALC_CMS.5, ALC_DEL.1, ALC_DVS.2, ALC_LCD.1, AST_CCL.1, AST_ECD.1, AST_INT.1, AST_OBJ.1, AST_REQ.1, AST_SPD.1 and AST_SSS.1, and always fulfilling the assumptions and the proper security policies satisfaction.

For any other threat not included in this list, the evaluation results of the site security properties and the associated certificate, do not guarantee any resistance.

The detail of these threats is documented in the Site Security Target [SST], chapter 4.2 (Threats).

DOCUMENTS

The site evaluation has been based on the evidences listed in the chapter 5 (Evaluation evidence) of the Evaluation Technical Report of Veridos Matsoukis S.A. Security Printing [EXT-8924].

These evidences describe the global procedures and security measures in the site. For each specific TOE, some accessory documents including specific characteristics of the TOE should be provided in addition to the above evidences.

The above evidences should be made available to ITSEFs in order to re-use the results of this certificate.

EVALUATION RESULTS

The site Veridos Matsoukis S.A. Security Printing has been evaluated against the Security Target [SST].

All the assurance components required by the evaluation have been assigned a “PASS” verdict are resistant to attackers with a High attack potential. Consequently, the laboratory Applus Laboratories assigns the “PASS” VERDICT to the whole evaluation due all the evaluator actions are satisfied, as defined by the Common Criteria v3.1 R5, the supporting document guidance CCDB-2007-11-001 Site Certification [SCER] and the JIWG supporting document Minimum site security requirements [MSSR].

COMMENTS & RECOMMENDATIONS FROM THE EVALUATION TEAM

Next, recommendations regarding the secure usage of the site are provided. These have been collected along the evaluation process and are detailed to be considered.

- The current PASS verdict is conditioned by the certificate of Giesecke+Devrient Mobile Security Development Center Germany validated by BSI [BSI-DSZ-CC-S-0185-2021-MA-01]. A revocation of DCG certificate would imply the revocation of this certificate.
- The service of secure destruction of smart card modules is limited to TOEs bigger than 2.5mm².

CERTIFIER RECOMMENDATIONS

Considering the obtained evidences during the instruction of the certification request of the site Veridos Matsoukis S.A. Security Printing, a positive resolution is proposed.

This Certification Report only applies to the site and its evaluated scope as indicated. The confirmed assurance components is only valid on the condition that all assumptions and preconditions required by the site, as given in this report and in the Site Security Target, are observed.

The owner of the certificate is obliged:

1. when advertising the Site Certificate or the fact of the Site Certification, to refer to the Site Certification Report as well as to provide the Site Certification Report and the Site Security Target and documentation mentioned herein to any client for the application and proper usage of the certified site,
2. to inform this Certification Body immediately about vulnerabilities of the site that have been identified by the sponsor or applicant or any third party after issuance of the certificate,
3. to inform this Certification Body immediately about security relevant changes in the scope of the evaluated site, e.g. changes related to the logical and physical development and production environment, to processes, and to services of the site.

In case of changes to the certified site, the validity can be extended to the changed site, provided the sponsor applies for assurance continuity (i.e. re-certification or maintenance) of the modified site, in accordance with the procedural requirements, and the evaluation does not reveal any security deficiencies.

RE-USE OF THE SITE CERTIFICATE

The re-use of this Site Certificate is limited to the extent defined in the Spanish Certification Body (CCN) Technical Interpretation “IT-003 Instrucción técnica: reutilización de resultados mediante la certificación de centros de desarrollo” [IT003], the Supporting Document Guidance Site Certification [SCER] and the SOG-IS Smartcard and similar devices supporting documents, such as the Minimum site security requirements [MSSR].

The results from a site certification can be re-used for product certifications. For each specific TOE, accessory documents including specific TOE characteristics should be evaluated in addition to the above specified documents. These evidences shall rely and shall be consistent with the evidences used in the site certificate evaluation and in the Site Security Target.

Currently the Recognition Agreements in place do not cover the recognition of Site Certificates. However, the evaluation process performed was outlined according to the rules of the agreements and by using the agreed supporting document on Site Certification [SCER] and [MSSR]. Therefore,

the results of this evaluation and certification procedure can be re-used by the issuing scheme in a subsequent product evaluation and certification procedure.

When re-using the results of the activities that uphold this site certificate in a product evaluation, the scheme responsible for certifying the product may decide to fully recognize the results or contact this scheme to query about specific assurance activities carried out in the scope of this site certification.

SITE CERTIFICATE VALIDITY REVIEW

In this case, and according to arrangements in SOG-IS Smart Card and similar devices technical domain, to re-use the evaluation activities that uphold this Site Certificate in a product specific evaluation, a reassessment of the assurance activities validity should be done at most 30 months after the site audit date as this site has been previously certified by means of an on-site audit by this Certification Body. Therefore, a reassessment of the assurance activities validity should be done before 01/02/2026.

SHARED TECHNICAL AUDIT REPORT (STAR)

The evaluation activities carried out in this site certification dossier have been summarized in a Shared Technical Audit Report (STAR). This STAR has been validated by this Certification Body according to [START]. The reference of the STAR is:

- **Report name:** SITE TECHNICAL AUDIT REPORT (STAR)
- **Report ID:** CCEVDM001R3-STAR-M1.
- **Version:** M1.
- **Issue Date:** 16/02/2024.
- **Issuing ITSEF:** Applus Laboratories.
- **Site audit dates:** 31st July and 01st August 2023.

The STAR report constitutes an evaluation evidence, therefore according to article 25 of Presidential Order PRE/2740/2007 which regulates the CCN Certification Body, written authorization must be requested by Applus Laboratories to the Certification Body to share any information of this certification dossier (including the STAR report) with third parties.

It is expected that if the applicant VERIDOS MATSOUKIS SECURITY PRINTING S.A. is willing to share the STAR report with any third party, they may contact Applus Laboratories to perform an authorization request to the CCN Certification Body to distribute this report.

SITE SECURITY TARGET

Along with this certification report, the complete site security target (SST) of the evaluation is stored and protected in the Certification Body premises. This document is identified as:

- Site Security Target Veridos Matsoukis S.A. Security Printing, version 3.3, 12/02/2024.

The public version of this document constitutes the SST Lite. The SST Lite has also been reviewed for the needs of publication according to sanitation [SANT], and it is published along with this certification report in the Certification Body. The SST Lite identifier is:

- Site Security Target Lite Veridos Matsoukis S.A. Security Printing, version 3.3, 12/02/2024.
